

I feel that in these time of high priced gas, War ect... this is one issue that needs to be dropped. I feel the political groups would agree with the NAB because of the recent campagne done by a group of truck drivers on the issue of toll roads. The listeners of 171 got threw to Washington and it disturbed them. Well Xm is the wave of the future. Come up to speed or get out of the way. I have one question. What happened to free enterprise? If people pay for it and it is legal. Tell those whom can't compete, To spend their time and resource's improving and building to better their services.

Home of the brave, Land of the free! The right to peruse happiness. Not to drive people out of work. That is the problem with this country in general. They chase away good companies by doing just this. Ask yourself, How many jobs are there going to be affected by this?
